

# RTV SILICONE COLORING AGENTS

Range of coloring agents dedicated to the coloring of RTV silicones. They are in the form of a pigment pastes made of pigment powder dispersed into silicone oil.

We advise not to put more than 2% by weight of coloring agent in the resin otherwise it may impact the reactivity and the properties of the silicones.

## Characteristics

	BLACK	WHITE	RED	YELLOW	BLUE
Concentration of pigment	±20%	±60%	±40%	±30%	±17%
Physical form	Paste	Paste	Paste	Paste	Paste
Light resistance	Full shade: 8 Reduction: 8	Full shade: 8 Reduction: 8	-	Full shade: 7-8 Reduction: 7	Full shade: 8 Reduction: 8
Weather resistance	Full shade: 8 Reduction: 8	Full shade: 8 Reduction: 8	Full shade: 4-5 Reduction: 4	-	Full shade: 4-5 Reduction: 4

Resistance properties are based on the data supplied by the pigment supplier. They may vary depending on the concentration and the base used by the customer that may influence the light resistance, weather resistance, heat stability, migration and other properties of the system.

## Storage

Do not store at temperatures <5°C or >30°C.

## References & Packaging

Our RTV Silicone Pastes are available in 250g tubes or 500g jars and are guaranteed for 18 months.

COLOR	PACKAGING	REFERENCES
Flesh color	250g, 500g	CSI C01, CSI C02
Dark flesh color	250g, 500g	CSI CF1, CSI CF02
Black	250g, 500g	CSI N01, CSI N02
White	250g, 500g	CSI BL1, CSI BL2
